

Expedience Software to Present at the APMP Nor'easters Award Winning Proposal Expo

BOSTON-- [Expedience Software](#), provider of leading-edge Microsoft *Word*® based RFP and Proposal Automation Software, today announced they will be presenting the session, "***Back to the Desktop – The Future of Online Collaboration***" at the Association of Proposal Management Professionals (APMP) Nor'easters Expo. Panelists will include Expedience representatives Melissa Mabon, Founder/CEO and Brooke Savage, VP/CFO.

"Until recently, real-time, online proposal collaboration was limited to stripped-down, web versions of Microsoft Word or other web-based word processors," explained Melissa Mabon. "Clunky, unreliable, with minimal functionality, 'Web Word' was never a realistic option for professional proposal writers. But the good news is that the trend in online collaboration is making a 180 degree turn back to the desktop – bringing real-time collaboration to the full desktop version of Microsoft Office. In this presentation we will be looking at online file sharing systems, OneDrive and Dropbox and how they currently support collaboration from within Microsoft Word, and we will take a forward look at Microsoft Word 2016 which promises to bring full, real-time collaboration to the desktop."

This presentation will take place at the **Marriott Courtyard in Marlborough, Massachusetts on November 5, 2015 at 2:00 PM Eastern Time USA.**

The APMP Nor'easters Expo brings together proposal professionals for the opportunity to learn from industry leaders, share ideas, and network. The conference will offer technical experts in formal presentations, as well as networking opportunities with attendees and vendors in the exhibit area, where attendees can examine the depth and breadth of modern proposal-related services and solutions in order to improve productivity and increase win rates.

As a Gold Sponsor of the Nor'easters Expo, representatives of Expedience Software will be available in the exhibit area for demonstrations and product discussion.
